GOLF TROLLEY REPAIRS

Lithium 4000 Pro Golf Buggy

The Bugg-ease Lithium 4000 Pro is a premium quality single seat golf cart. Offering a lithium battery as standard, as well as a wealth of other great features, we believe our one man golf buggies are the best on the market. Furthermore, they're in stock today and available to test drive before you buy.

Stable & Streamlined Golf Buggy

The Bugg-ease Lithium 4000 Pro one man golf cart boasts a brand new chassis design for 2023. The new twisting chassis offers not only unrivalled stability and an attractive and streamlined design, it also fully encloses the control unit with the very latest in waterproofing technology.

So, you can be assured that whatever the weather, your golf buggy won't let you down. Another key point is that even with this high level of protection, there is no compromise on weight. Your one man golf buggy is still lightweight, and easily fits into even a small car.

Superior Lithium Battery Included as Standard

That's why all our buggies come with a lightweight waterproof Lithium ION 36 hole battery and charger, which provides 45km on a full charge – more than enough for a couple of rounds

What's more, your battery can be charged on the buggy, or easily removed for charging at home if you store your buggy at your golf club.

All Features of our Golf Buggy are Car Friendly

The Lithium 4000 Pro is extremely car-friendly and is simple to load into even quite small cars. Ramps are available, allowing you to drive your buggy into and out of your car, either by using the throttle, or with a remote control (supplied free of charge on request).

Two Speed Settings mean our Golf Cart Copes with any Incline

The Bugg-ease Lithium 4000 Pro comes complete with 24v motor, and thanks to its two speed settings, it copes with any incline you're likely to find on a golf course. It also features anti-roll safety wheels, which coupled with the twisting chassis, automatic electromagnetic breaking system ensuring a safe and comfortable ride every time. The 4mph speed setting means our single seat golf buggy is Class 2 Road Legal, meaning you can ride it on pavements (or roads if there is no pavement) with the same rights as a mobility scooter. This is a great advantage, meaning you can even drive the buggy to and from your golf club.
